Model 2008 **HEAVY DUTY TESTER KIT**

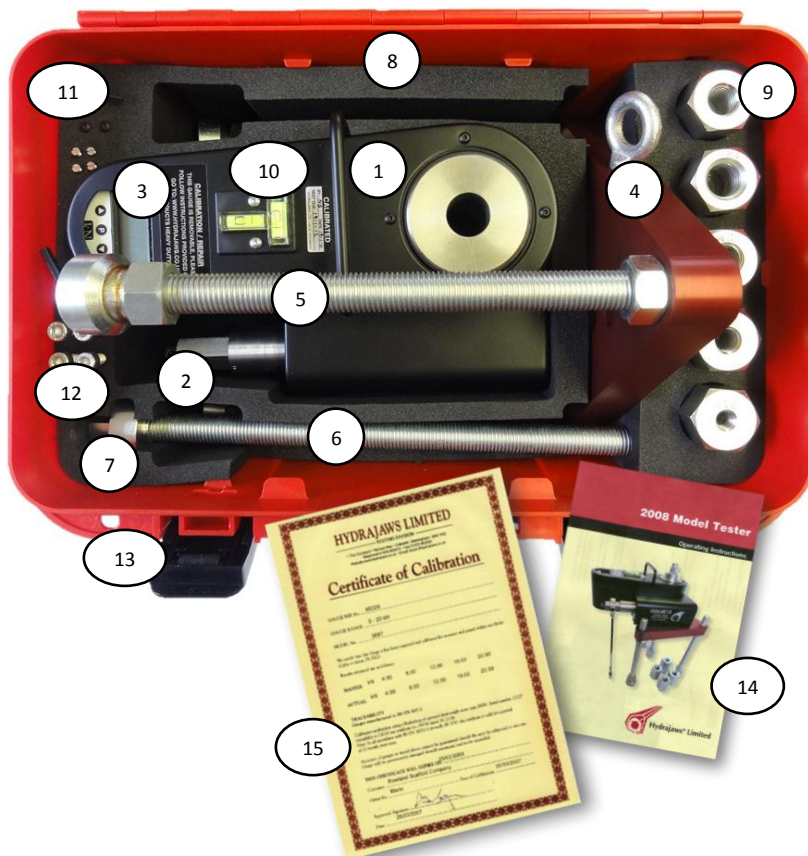

"The portable self-contained 145kN Model 2008 Heavy Duty Tester has been designed to meet the demand for proof load testing of larger construction fixings. A lightweight triangular shape aluminium load spreading bridge has been designed specifically for the model 2008 tester and directs reaction loads away from the fixing, this combined with the tester weighs only 14kg.

Load application is achieved via a ratchet handle driving a hydraulic multiplier and the applied load is recorded on a digital gauge which is integral with the tester.

This compact design of tester and load spreading bridge is lighter and more convenient to apply than a separate hydraulic pump and cylinder arrangement."

KIT CONTENTS:

1. Model 2008 Tester Body
2. Operating Nut
3. Digital Gauge
4. Load spreading Bridge with 10mm eye hook
5. 3 adjustable legs with swivel feet
6. Connecting Rod M20
7. M20 Adjustable Nut
8. 22mm Ratchet Spanner
9. 5 Threaded Adaptors M12, M16, M20, M24, M30
10. Spirit Level
11. Allan Keys
12. Spare screws
13. Carry Case with Filler
14. Operating Instructions
15. Calibration Certificate
